What Is Being Done?

Bridge repairs on the M-43 bridge (West Main Street) over US-131 in Oshtemo Township. Work includes a concrete bridge deck overlay, bridge approach replacement, substructure work, bridge painting, and the addition of a new pedestrian access across the bridge.

When Will This Be Done?

Work is scheduled to begin in June and continue through early November.

How Will Traffic Be Affected?

Traffic will be maintained on US-131 using lane shifts. At least one lane of M-43 will be open in each direction. There will be ramp closures during portions of the project. The dates will be announced, with detour routes posted on Stadium Drive and 9th Street.

Long-term Benefits

The bridge improvements and new pedestrian access will improve safety and increase mobility for motorists and pedestrians.

MDOT's 2013 road and bridge program supports the creation of jobs, growth of the economy, preservation of the environment and the safety and security of the transportation system.
